

THE FIRST BIO-CYBERNETIC TREATMENT AGAINST ALL IMPERFECTIONS

Intuitive touch screen with prest programs and protocols.

Intelligent software guides the operator step by step, showing:

- Movement
- The pressure to be made,
- The electrode and the gel to be used

Face treatments:

- Dark circles • Eye contour
- Face lifting • Acne
- Wrinkles • Spots

Body treatments :

- Cellulite • Localized fat
- Draining • Scars • Strech marks

Equipped with specific electrodes to treat every part of the body.

Breast treatment:

For toning, remitted and increase the volume of the breast, with no contraindications even in presence of prosthesis.

Two lines of treatment:

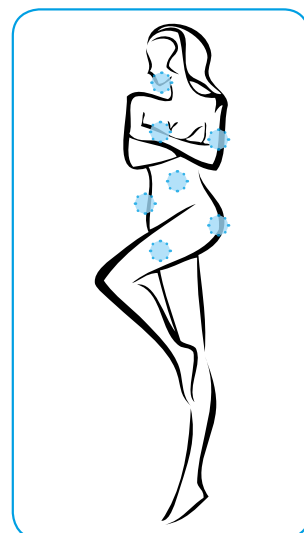

- Stimulation of biological cells
- Stimulation through the energy channels and chakras.

RMF1

REGENERATION MODULATION,
FEED BACK ... THE FIRST ONE IN
THE WORLD

ACTIONS:

- LIFTING • BREAST LIFTING • ACNE • SCARS
- CELLULITE • FAT REDUCTION • ENERGY STIMULATION

Treatable areas:

- Double chin • Arms • Abdomen
- Buttocks • Thigs • Hips • Face
- Breast

MADE IN ITALY

RMF1

REGENERATION MODULATION,
FEED BACK ... THE FIRST ONE IN THE WORLD

THE TECHNOLOGY:

RMF1 is the world's first technology that corrects imperfections through REGENERATION. RMF 1 due to its probes, can measure precisely - what no other machine can measure - the bioelectrical condition of the tissue of the customer in terms of the electric potential of the membrane. Most of technologies exploit the natural processes of self-regeneration by creating controlled tissue damage (hyperthermia, combustion ...)

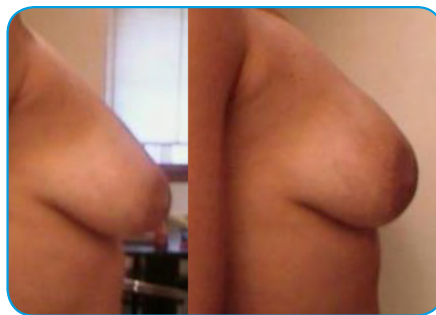

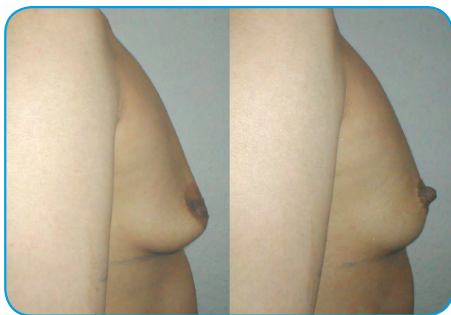

RMF1 uses electromagnetic fields of low intensity to restore the correct membrane potential. Every living organism is a generator of electricity. Each individual cell generates electricity through the passage of substances through the Na-K pump (Sodium-Potassium), the system which regulates the concentration gradient of sodium and potassium into the cells. When this balance of substances is lacking, the electric potential cell undergoes a change and the cell stops functioning optimally. Each cell has an electric potential that is the basis for its proper functioning.

RMF 1 treats the whole body and is ideal for every imperfection: the base of every imperfection is always generated by a local metabolic malfunction of the cell. Restoring the correct electric potential of the membrane we can to re-establish intercellular processes and correct exchanges, thus solving the blemish.

RMF1 through its sensors measure the electrical potential of the cells, it compares it (FEED BACK) with the electric potential registered in its database (more than 70,000 values of correct electrical potentials of all areas of the body) and returns with an appropriate electrical impulse to correct it if it finds a value is not optimal.

The software guides the operator of RMF 1 in all the steps of the treatment, from the initial setting to be entered in accordance with the physical and demographic information of the client to the manuality of each handpiece used during treatment, making possible in this way a highly personalized treatment.

RMF1 is the only non-invasive technology capable of regenerating the breast with surprising results. It is possible to treat even in the presence of prosthesis.

CONTRAINDICATIONS:

- Pacemaker
- Pregnancy

INFORMATION:

- Number of sessions: 6/20
- Session interval : once or twice a week
- Session duration : 20/60 minutes depending on the treatment

TECHNICAL SPECIFICATIONS:

| | |
|----------------------------|---|
| Model: | RMF1 |
| Supply: | 220-240V – 50Hz |
| Power: | 100W |
| Frequency: | 1-625Hz |
| Power max consumption: | 100mW |
| Classification IEC 60601-1 | Class I, type B |
| Display: | Digitale touch screen |
| Weight: | 15 Kg |
| Size: | L600xP500xH500 mm |
| Operating Conditions: | Temperature: 15°C - 35°C Humidity: 30% - 60% Pressure: 86Kpa - 106Kpa |
| Storage and transport: | Temperature: 5°C - 45°C Humidity: 30% - 70% Pressure: 86Kpa -106Kpa |
